

SQ.D0.M22 Valve Series

METRIC Cartridge – 300 Bar

Direct acting with external Pilot and Vent

Description & Operation

The SQ.D0.M22 is a screw in, cartridge style, direct acting, spool type hydraulic sequence valve with external pilot. Spring chamber is constantly air vented. The valve is design to open flow connection between two ports that were previously blocked. In the idle condition, the AQ.D0.M22 blocks flow between ports 2 and 3. Once pilot pressure at 1 attains the spring setting the spool shifts and allows flow between ports 2 and 3 in both directions.
