CHECK VALVES

S.H0.S10

SAE10 Cartridge - 420 bar
Direct acting - Ball type

Description & Operation

A screw-in, cartridge style, direct acting ball type check valve. Main use is as a blocking or load-holding device. The S.H0.S10 allows flow passage from port 1 to 2: the cartridge has a fully guided check which is spring-biased closed until sufficient pressure is applied at port 1 to open to 2. The flow is blocked in the opposite direction (2 to 1).
